

Explanation Sudoku with symbols

Totally there are nine different symbols, namely:

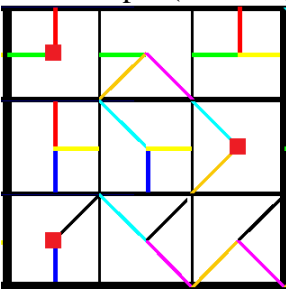

Four diagonals, a vertical line upwards, a vertical line downwards, a horizontal line to the left, a horizontal line to the right and a little block. in the middle. All these nine symbols are printed in a different color. In each row, column and block these symbols are find three times, totally 27 symbols. In fact the Sudoku consist of three combined Sudokus

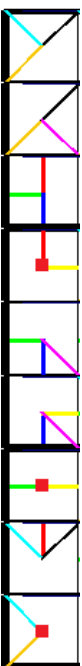

For example (solution, in a row):

For example (solution, in a block):

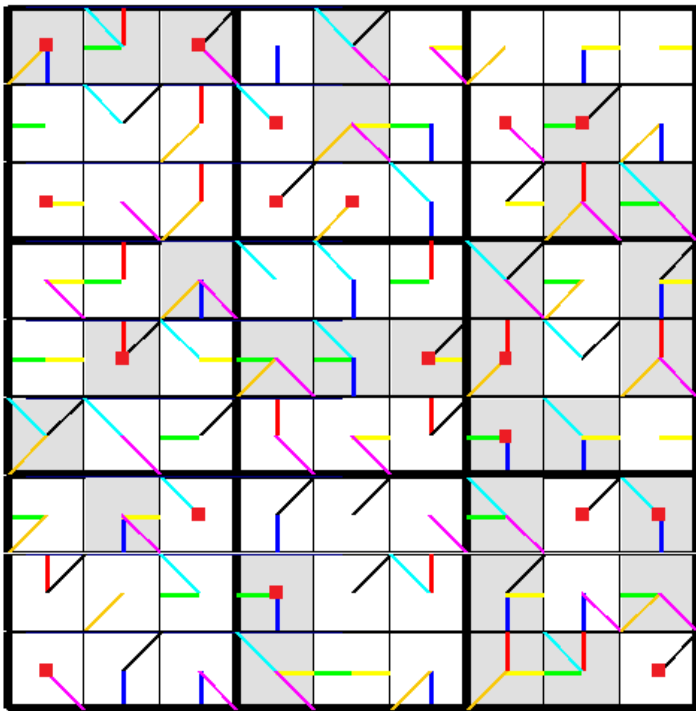

For example (solution, in a column):

The total Puzzle looks like:

The positions with a grey background consist already three symbols, so are already solved.

The solution looks like:
