

# Sudoku Plaza

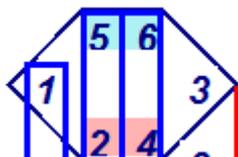

## Explanation Sudoku with six numbers (Honeycomb).

Solution:

This Sudoku variant uses the numbers 1, 2, 3, 4, 5 and 6.

In the hexagon the numbers 1 up to and including 6 are once prevented.

In the horizontal rows marked with the different background colors the numbers 1 up to and including 6 are once prevented

The blue background color:

The green background color:

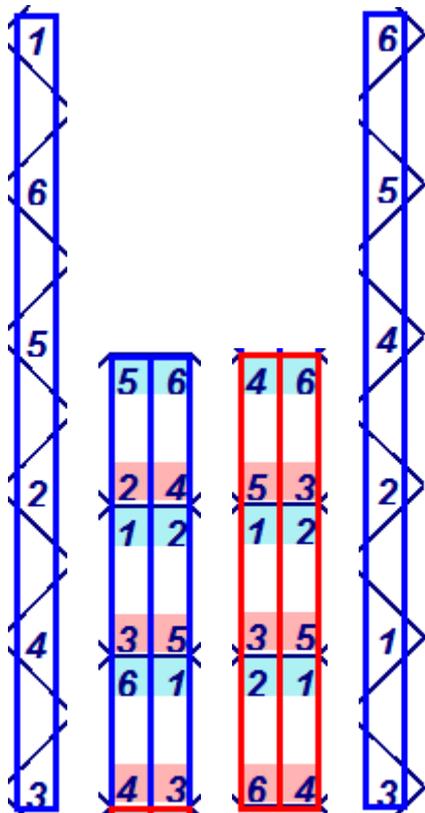

The yellow background color:

The red background color:

In the vertical columns marked with right angles with the border colors blue and red, this rule is used as well.
